Tangerang Kota, Banten, 15151

Informatics student at Universitas Multimedia Nusantara with hands-on experience in web and mobile application development. Skilled in PHP, Laravel, React Native, Vite, TypeScript, Supabase, MySQL, and software engineering principles. Experienced in developing e-commerce platforms, information systems, chatbot integrations, and mobile applications.

## Education Level

### Universitas Multimedia Nusantara

Bachelor of Informatics, 3.40/4.00

2023 - Present

- Studied Software Development, Object-Oriented Programming, Database Management, and Data Analysis.
- Developed applications using PHP, Java, Python, and TypeScript.
- Collaborated on software development projects following SDLC principles.

### SMA YADIKA 5 Joglo Jakarta Barat

High School Diploma

2020 - 2023

- Strong foundation in Mathematics and Science
- Developed analytical thinking and problem-solving abilities
- Strengthened teamwork, discipline, and time management skills

## Project & Experience

### Mobile App Developer - React Native Expo, TypeScript, Supabase

Apr 2026 - Jun 2026

#### Toko Juara Kelas E-Commerce App

- Developed a mobile e-commerce application with authentication, product catalog, wishlist, cart, checkout, and order history features.
- Implemented QRIS payment integration with payment proof upload and verification workflow.
- Built admin dashboards for managing products, users, orders, and customer interactions.
- Developed delivery and pickup order flows, including shipping fee calculations and inventory tracking.
- Applied secure authentication, database policies, and order management workflows.

### Mobile App Developer - React Native Expo, TypeScript, Supabase

Mar 2026 - May 2026

#### DarahKita Blood Donation App

- Developed a cross-platform blood donation application with Email OTP and Google OAuth authentication.
- Implemented interactive maps, blood stock monitoring, and location-based services.
- Built real-time admin dashboards and analytics using Supabase Realtime.
- Developed QR Code event ticketing and automated check-in functionality.

### Web Developer - Laravel, PHP, MySQL

Jan 2025

#### Website Gereja RPBI Sion Karawang

- Developed a church information system with worship schedules, event management, registration, and gallery features.
- Applied MVC architecture and Object-Oriented Programming principles using Laravel.
- Collaborated in requirement analysis, development, testing, and deployment processes.
- Improved information accessibility and communication for church members and administrators.

### Web Developer - PHP, MySQL

Dec 2024

#### Vitamin Ultigar Affiliate E-Commerce Website

- Developed an affiliate e-commerce platform for health supplement recommendations.
- Built chatbot consultation and real-time customer support chat features.
- Implemented authentication, role-based access control, and admin dashboard management.
- Designed and optimized MySQL databases to support application performance.

## Organisational Experience

### Starlight 2025 – Universitas Multimedia Nusantara

Ensurer / Security Division Member

- Ensured safety and order during event activities.
- Coordinated crowd control and event security operations.
- Assisted in maintaining smooth event execution.

### Serah Tahunan UKM 2025 – Universitas Multimedia Nusantara

Accommodation Division Member

- Managed accommodation and logistical arrangements.
- Coordinated room allocation and facility readiness.
- Supported event operations through effective communication and teamwork.

## Certification

- Earned Introduction to Python and Python Intermediate certificates from SoloLearn, demonstrating theoretical and practical proficiency in Python.
- Enrolled in HCIA-AI V3.5 Course – Huawei Certified ICT Associate (Offline: 2025-09-30) focusing on Artificial Intelligence,
- Enrolled in HCIA-openGauss V1.0 Course – Huawei Certified ICT Associate specializing in database management systems.

## Technical Skills

- Languages: PHP, Java, Python, TypeScript, C#
- Frameworks: Laravel, React Native, Expo
- Database: MySQL, PostgreSQL, Supabase
- Tools: Git, GitHub
- Concepts: REST API, OOP
